The European Commission's proposal for a directive on contracts for the supply of digital content has provoked a vivid debate about the rights and duties of consumers and service providers regarding the implications of the proposed directive and on the legal challenges not solved by the proposed instrument.

The presentations will pay special attention to the characterization of those contracts, to interoperability and portability of digital contents, to data as counter-performance and to the consumer's right to retrieve data and content.

Registration: amit.datta@rewi.hu-berlin.de

(until 26 September 2016)

Admission fee: 50,- EUR

(free participation for students and PhD candidates, limited capacities)

Venue: Humboldt-Universität zu Berlin
